

Our diesel engine drive pumping units have been designed to produce the most cost-efficient and reliable system for the customer.

All of our engine driven pumps are powered by one of our water-cooled diesel engines. Watertec uses high quality multistage pumps from Rovatti and Caprari which have a variety of volumes and pressures.

Standard Options

- Two-tire chassis with incorporated fuel-tank
- Stabilizer legs
- Standard electric start with battery
- Engine protective panel (in case of oil low-pressure, engine overheating, drive belt break, water pressure fail)
- Pressure switch
- Pressure gauge
- Tachometer
- Hours meter
- Suction and discharge flanges
- Roof
- Exhaust primer
