

Rovatti pompe Model T3- 100 Pump

The “T” series P.T.O. pumps are a fantastic choice for high performance sprinkler irrigation. These pumps are very quick and easy to set up! They are capable of large gallons per minute output with high pressure performance! This series of pumps has a very intricate water circulation cooling system which allows the gearbox to remain cool at all times. This allows for a long life span for the gearing, under any conditions or strains. See the chart below for flow rates and pressure!

rovatti pompe

Standard Equipment:

- Two-wheeled heavy-duty cart
- P.T.O. Shaft
- Three-point linkage frame
- Full suction and discharge fittings
- Discharge priming valve
- Hand primer
- Suction extension
- Hose nipple
- Quick action lever couplers.

Specifications:

- Robust high quality cast iron construction
- Dynamically balanced enclosed centrifugal impeller
- Oil lubricated gearbox with level dipstick
- Axial inlet and scroll outlet
- Water-cooled gearbox
